

**HW 1: Vim Commands (Solution)**  
**CMSC 340**  
**Spring 2013**

Your solution must EXACTLY duplicate the intended result, so be careful about whitespace. When writing out your example, separate each keystroke by white space. Use ESC to represent the escape character, SPACE to represent the space bar, and ENTER to represent the return key.

**Document**

*I have often wondered whether or not the world would be a better place without soup. Soup has a narcotic effect that few recognize, but that can lull the unsuspecting consumer into a false sense of security. Would there be fewer crimes if soup were illegal? And what would the cost be? Sure, Campbell's would make a little less money. But isn't the good of the many, the populace, much more important than the excess profits of a few wealthy business owners? Surely not! Therefore, we must take drastic action against the soup-lords who keep us chained to their slums.*

**Tasks**

A. Replace the word “recognize” with the word “identify”. (13)

j 4 w c w i d e n t i f y

B. Delete the last line. Also delete the remaining part of the last sentence on line 5. (6)

/ ! ENTER l d }

Better: (4)

G ( d )
